

# Pawsey User Forums

## Introduction

---

The Pawsey User Forums provide an opportunity to discuss your experiences using Pawsey services and provide feedback to staff. We want to hear from you to find out what we are doing well and where we can improve!

Your feedback can cover all aspects of interactions with the Pawsey Supercomputing Centre. This may include the full project lifecycle of application, allocation management, usage, and reporting for the various supercomputing, data, cloud and visualisation systems that Pawsey operates.

User Forum events are held approximately four times a year at various locations around Australia.

## Upcoming Sessions

---

Refer to the [Pawsey Upcoming Events page](#) for announcements and registration information.

## Feedback from Previous Sessions

---
